## EDUCATION

### Northeastern University

B.S. in Computer Science, Software Concentration | GPA: 3.87/4.00

Boston, MA

Sep 2023 - Expected May 2027

## TECHNICAL SKILLS

Languages:

TypeScript, Java, Python, SQL, C++, HTML/CSS

Frameworks & Libraries:

React, React Native, Next.js, Node.js, Expo, TailwindCSS

Tools & Infrastructure:

PostgreSQL, Supabase, Docker, Git, Datadog, New Relic, LaunchDarkly, Figma

## EXPERIENCE

### Software Engineering Co-op

Jul 2026 - Present

DraftKings Inc. (*Casino Web*)

Boston, MA

- Architecting the frontend for a real-time bitcoin-prediction game, delivering SolidJS and PixiJS canvas interfaces with low-latency WebSocket state synchronization, strict tick parsing, and GitOps/Terraform deployment pipelines
- Authoring the end-to-end technical specifications for an experiment-gated game info drawer redesign, defining backend service contracts, async loading boundaries, and automated rollback criteria across two casino brands
- Driving cross-functional execution across Frontend, Backend, Product, and Design by decomposing technical milestones into actionable sprints, prototyping the drawer search journey, and migrating legacy design-system components

### Software Engineering Co-op

Jul - Dec 2025

DraftKings Inc. (*Casino Web*)

Boston, MA

- Owned frontend architecture and implementation of a new live-blackjack experience for a 28M-user casino platform, building high-performance React features with Jotai-based state orchestration, cache optimization, and UI performance
- Defined end-to-end technical direction, authoring the complete architecture proposal, reverse-engineering legacy systems, and designing new data flows that unlocked scalable game-launch capabilities across backend services
- Led cross-functional delivery by driving execution across Frontend, Backend, Product, and QA—scoping work, writing technical tickets, resolving blockers, and ensuring a clean regression cycle and production-ready launch

### Founder & Co-President

May 2024 - Dec 2025

Kappa Theta Pi Professional Technology Fraternity

Boston, MA

- Established Northeastern's first professional tech fraternity, scaling the founding organization to 65+ collegiate members
- Spearheaded recruitment and professional pipelines, expanding applicant interest by 40% over three consecutive cycles
- Directed operations and budget, executing 20+ technical workshops, hackathons, and corporate networking events

## PROJECTS

### Kappa Theta Pi National App | React Native, Expo, TypeScript, Next.js, Supabase, Figma

Jul 2025 - Present

- Designed wireframes and system architecture for a multi-tenant platform used by 30+ chapters and 1,200+ members to streamline recruitment and chapter operations across the country's universities
- Built the Expo/React Native member app: real-time event feed and week calendar synced over Supabase Realtime, optimistic RSVPs, rotating-QR attendance check-in, Expo push notifications, and a searchable national directory
- Shipped a Next.js E-Board dashboard with server-component reads and server actions powering an inline-editable roster and chapter analytics, driven by a single field registry that generates every editor and its server-side validator

### SearchNEU (Sandbox @ Northeastern) | TypeScript, Next.js, TailwindCSS, Drizzle ORM

Jan - Apr 2026

- Architected interactive scheduling and conflict-detection workflows over live university catalog data, serving 10,000+ active students during peak semester registration windows
- Built dynamic constraint-filtering engines across campus, open-seat status, and free-day availability, pairing complex schedule generation with zero-auth local persistence for shareable, resumable plans
- Engineered core schedule layout within the modular scheduler package, collaborating across a 28-person team

## INTERESTS

Spoken Languages:

English (fluent), Albanian (native), Greek (native), French (intermediate)

Hobbies:

Cinema, Cooking, Hostel Travel, Jazz, Literature, Basketball, Comics
